NPIC/D-72-61
28 July 1961

MEMORANDUM FOR: Major Clifton E. James, SAFMS

SUBJECT: SAMOS Reports

1. While [] was at Westover Air Force Base a couple of weeks ago he was shown a copy of a report on the E-2 configuration. It was suggested then that a copy of this would be quite valuable to NPIC in planning for the exploitation of material from this program. The report was designated as IMSD 917171 of 6 February 1961, "Systems Engineering Analysis Report", Secret. I understand that similar reports are available on the E-5 and B-6 configurations.

25X1

2. We feel that the information contained in such reports is significant to NPIC's operation and would appreciate your assistance in determining if copies of these are available. These reports would be handled in NPIC with the same consideration given to other sensitive information concerned with the operational aspects of the SAMOS program.
